Mission Statement

Our mission is to enhance maritime operations through innovative support services, premium maintenance products, and advanced software solutions. We are dedicated to ensuring operational efficiency, safety, and compliance, providing tailored solutions that meet the unique needs of our clients and their crews.

Company Description

GA Marine Survey CC specializes in delivering comprehensive maritime support services and cutting-edge products designed to streamline vessel operations. With a focus on efficiency and safety, we provide expert crew management, reliable maintenance solutions, and innovative software tailored to the dynamic needs of the maritime industry. Our commitment to quality and local engagement sets us apart, ensuring our clients benefit from the best practices and resources available.

Services Offered

- **Coordination and Transportation:** Expert management of crew changes and safe, reliable transportation.
- **Accommodation and Catering:** Securing the best rates for hotel accommodations through negotiated corporate pricing, with a variety of meal options.
- **Visa Application Services:** Comprehensive handling of visa applications for international crew members.
- **Local Crew Requests and Training:** Connecting clients with qualified Namibian crew, ensuring all necessary certifications, and facilitating training to prepare them for their roles.

Products Offered

1. Admiral Paint:

- **Synthetic Top Coat Paint:** Durable and versatile, available in various colors to protect and enhance marine vessels.
- **Anti-Rust Primer Paint:** Effective rust and corrosion prevention, offered in Red Oxide and Grey to meet different needs.

2. Rust Converter:

- **Transformative Rust Treatment:** Converts rust into a protective coating, extending the life of marine steel structures, equipment, and surfaces.

Maritime Software

GA Marine Survey Logbook:

Our advanced software platform offers a comprehensive suite of tools for maritime operations, including:

- **Event Tracking:** Monitor key events to maintain operational oversight.
- **Task Planning:** Organize and schedule tasks for streamlined workflow management.
- **Safety Management:** Includes essential features like Toolbox Talks, Risk Assessments, and Permit to Work to ensure compliance and safety.
- **Continuous Improvement:** Utilize historical data to provide actionable insights, enhancing best practices and operational efficiency.

Marine Drone Services

Enhance your inspection capabilities with our Marine Drone Services, offering both outdoor and indoor inspection solutions. Our drones are equipped for **OUTDOOR INSPECTION** (including cranes, wind turbines, and aerial views) as well as **INDOOR INSPECTION** of confined spaces such as voids, ballast tanks, potable water tanks, cargo holds, and storage tanks. Our services include **thickness measurement with drones**, providing precise and efficient assessments of structural integrity without the need for manual intervention.
